Skin tone up

Improves skin elasticity

Normalization of inner skin

Strengthening skin barrier

Shiny skin

What is HA (Hyaluronic Acid) of BIOJUVA®?

Hyaluronic Acid is an ingredient which naturally exists in human body as a component of cell and substrate. It reduces as we get older and as a result, skin loses the elasticity and has more wrinkles. For the dry and elasticity losing skin, delivering Hyaluronic Acid directly to percutaneous layer of skin is the most effective way to feel the immediate effect.

*Reduction of Hyaluronic Acid may lower the vitality of skin to cause xerosis and skin disease.

Recovery of skin elasticity, moisture supplying, improvement of environment in skin, Strengthening of skin barrier, glowing skin, brightening skin tone

BIOJUVA® Combines the most effective solutions for skin

What is PDRN(Poly Deoxy Ribo Nucleotide) of BIOJUVA®?

It is a DNA obtained by extracting from the testicles of salmonidae fish and a regenerative activity material existing within the living body. This acts on tissue formation and cell division as a regenerative ingredient and helps to improve the skin within short-term period.

Boosting proliferation of multiple growth factors

Rapid regeneration of wounded skin

Solving general skin problems with the activation of micro circulation

What is Niacinamide of BIOJUVA®?

Whitening

Moisturizing

Trouble Improvement

Anti-Aging Improvement

'Niacinamide' is a typical whitening ingredient authorized its whitening and moisturizing effects by MFDS (Ministry of Food and Drug Safety)

'Niacinamide' which is vitamin B complex and class 0 of physiological activity amide EWG (Environmental working Group) of niacin improves the moisture controlling functionality of skin itself as a material to activate the lipids which play the most important role in moisturizing control within the skin. It is excellent in skin safety and stability and involved in the generation of bioenergy to play roles of whitening, moisturizing and improving skin tone brightly. Also, it has a strong point that can be used without any limitation of time as this is not impacted by light and heat which are external environment factors.

Niacinamide (C₇H₆O₃)

BIOJUVA® ensures a high level of satisfaction for you and your patients

Predictable very high practitioner satisfaction with an average score of 9.2/10

Predictable excellent patient appreciation with an average score of 8.9/10

Practical guidance for treatment phases

Initial treatment phase
6 months
